Bluesign gives access to its verified chemical products for free

Bluesign will now offer free access to its web-based bluesign® FINDER, the most comprehensive chemical products positive list.

The bluesign® FINDER includes over 12,000 third-party verified commercially available textile dyes and auxiliaries out of more than 25,000 evaluated chemical products. The web-based bluesign® FINDER shows the latest data on chemical products from more than 170 chemical suppliers, all following a responsible care approach with excellent knowledge of product stewardship and demonstrating outstanding environmental and occupational health & safety performance.

All chemicals registered in the bluesign® FINDER, the world's first and most comprehensive positive list of commercially available chemical products, have passed the bluesign® CHEMICAL ASSESSMENT. They comply with the bluesign® SYSTEM BLACK LIMITS (BSBL) limits, and meet the highest requirements for product stewardship including on-site assessment of the chemical supplier.

Another powerful service from Bluesign to drive a sustainable switch to safer chemicals in textile manufacturing is now available for free.

About bluesign technologies ag

The bluesign® SYSTEM is the key to sustainable textile production. It eliminates harmful substances right from the beginning of the manufacturing process as well as sets and controls standards for an environmentally friendly and safe production. This not only ensures that the final textile product meets very stringent consumer safety requirements worldwide, but also provides confidence to the consumer in acquiring a sustainable product.

bluesign technologies ag was founded in 2000. Since then, the bluesign® SYSTEM has been adopted by worldwide leading textile and accessory manufacturers. Various significant key players in the chemical and machine industry rely on the bluesign® SYSTEM. Well-known brands in the outdoor, sportswear, and fashion industry rely on the extensive knowledge that bluesign technologies ag provides worldwide.
