

ITMA 2023

**08 — 14
JUNE 2023**

FIERA MILANO RHO
MILAN . ITALY

www.itma.com

**TRANSFORMING
THE WORLD
OF FIBRES,
YARNS &
FABRICS**

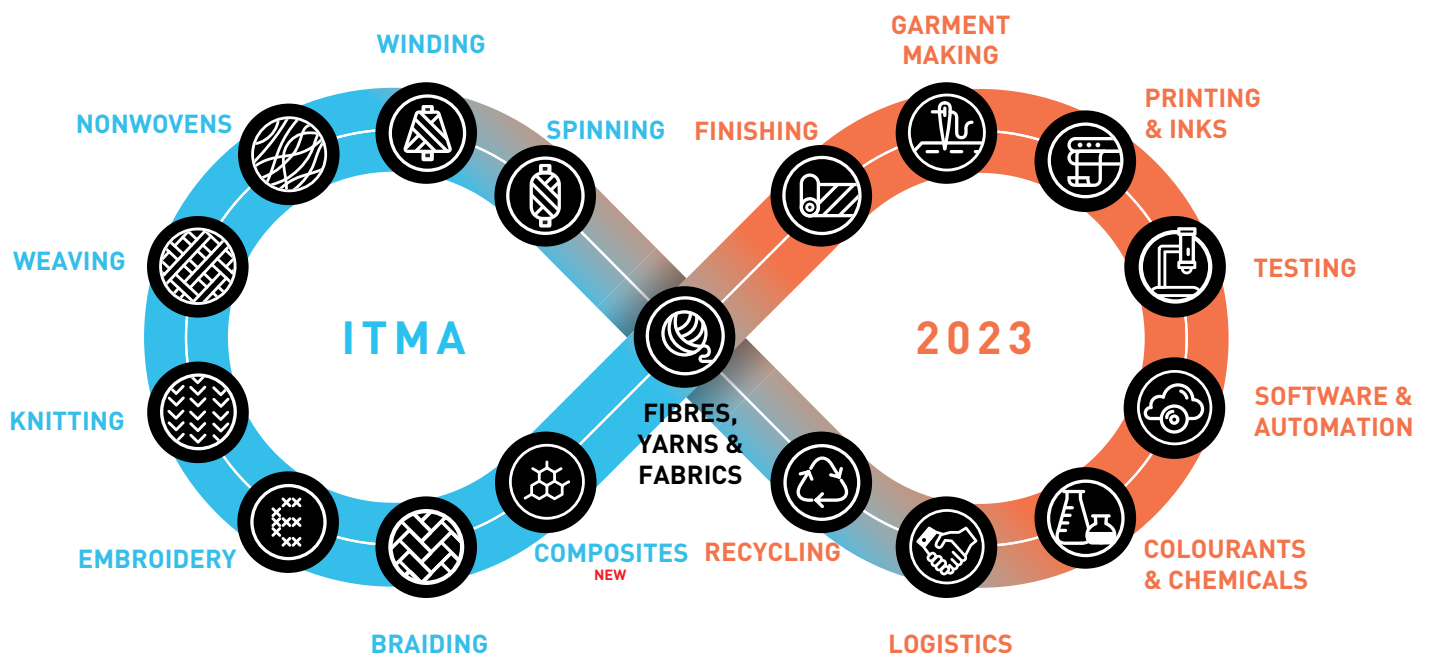

**REIMAGINING OUR MATERIAL
WORLD WITH INNOVATION**

Innovative fibres, yarns and fabrics are shaping the world we live in and the future of fashion and manufacturing.

The main factor that enables us to keep pace with consumer expectations is the advancements in materials and applications. These new innovations and technologies deliver better opportunities and make us more efficient.

The sustainable future demands a circular economy. To achieve this, we must look to newly available and sustainable materials.

Fibre, yarn & fabric manufacturing value chain at ITMA

THE ITMA ADVANTAGE – END-TO-END COLLABORATION

Reinventing an industry is very complex – it is essential to connect each part of the process correctly. ITMA is the only place where the entire value chain gets together – both technology and raw material.

ITMA BLENDS TECHNOLOGY AND MATERIAL TO DEMONSTRATE THE FUTURE:

- An attractive showcase of fibres, yarns and fabrics in an integrated textile technology exhibition
- Live demonstrations of new material processing using the latest machinery and technology
- End-to-end collaboration between material manufacturers and technology builders makes this the most powerful platform for change in our industry

DEEP CONNECTIONS WILL DRIVE THE SUSTAINABLE FUTURE

Buyers need confidence that the products and processes they need will fit with the rest of their solution chain. This is only possible at ITMA where detailed conversations on customised solutions can be explored, face-to-face.

Put yourself at the heart of the future at ITMA 2023.

- Collaborate with other suppliers to deliver the very best solutions.
- Be a part of the largest global fibres, yarns & fabrics movement.
- See, listen and discuss about customising manufacturing processes throughout the supply chain with live machinery demonstration!

/// Lenzing has been a part of ITMA since the launch of the fibre and yarn chapter in 2011. Since then, ITMA has become an important exhibition for us as it gives us a chance, as a fibre producer, to meet a broader audience. We were able to reach a wide variety of visitors sourcing for different solutions, from apparel to technical textiles. We will be back at ITMA 2023!

Gabriele Emlinger, Regional Director TCS Europe & Americas and FPU, Lenzing AG

- Jiangsu Sanfangxiang
- Jiangsu Shenghong
- Kale Iplik
- Karsu Tekstil
- Kelheim Fibres
- Lafayette
- Lenzing
- Muratec-Vortex Yarns
- Nurel
- Nylstar
- Pages Valenti
- PT Asia Pacific Rayon
- Rieter Machine Works
- S. Vilarrasa
- Selçuk Iplik
- Technical & Textile Service
- The Woolmark Company
- Utenos
- And More

Product innovation requires complete collaboration with the supply chain, as well as working closely with machine manufacturers to innovate and push innovations to brands and designers. In the same way, it is important to work closely with brands and designers, and then with the supply chain to innovate more products.

Julie Davies, General Manager of Processing Innovation and Education Extension, The Woolmark Company
