

Press Release

New powerful tribological solutions for the textile industry

**Klüber Lubrication at the ITMA 2019 from 20 to 26 June in Barcelona
hall 8.1, stand A209**

Munich, 20 June 2019 – Textile machines are composed of very complex and sophisticated mechanical components. Speciality lubricants make a major contribution to increasing the efficiency in production. Moreover, they are a key to more energy efficiency and sustainability. At the ITMA 2019 Klüber Lubrication will be showing not only its high-quality speciality lubricants but also the automatic lubricant dispensers of the Klübermatic series as well as the services it provides to increase energy efficiency.

KlüberEnergy – Reduce energy costs and increase sustainability

In addition to forming a major part in operating costs, energy consumption also negatively affects the carbon dioxide footprint of a company. With KlüberEnergy Services, Klüber Lubrication offers comprehensive advice on the tribological systems used in the textile industry and helps realise energy saving potentials. "We do not only support our customers in reducing their energy costs but also in keeping their CO₂ footprint low", explains Christian Forster, market manager textile industry at Klüber Lubrication.

Klübermatic – The right lubricant at the right place at the right time

Excessive or insufficient lubrication of components are among the most common errors occurring in lubricant use. The automatic lubricant dispensers of the Klübermatic series enable a reliable and precise lubrication, especially in the case of friction points that are difficult to access. The automatic lubrication systems do not only prevent overlubrication of components and hence minimise the risk of fabric contamination, but they also help counteract premature wear of machine parts due to

insufficient lubrication while extending maintenance intervals and reducing production losses."

Under the motto "We make your favourite pieces last longer" the experts from Klüber Lubrication will be pleased to answer all questions about tribological solutions, energy efficiency and sustainability at the ITMA 2019 in hall 8.1, stand A 209.

About Klüber Lubrication

Klüber Lubrication is one of the world's leading manufacturers of speciality lubricants, offering high-end tribological solutions to virtually all industries and markets worldwide. Most products are developed and made to specific customer requirements. During its 90 years of existence, Klüber Lubrication has provided high-quality lubricants, thorough consultation and extensive services, which has earned it an excellent reputation in the market. The company holds all common industrial certifications and operates a testing section hardly rivalled in the lubricants industry. Klüber Lubrication, set up as a retail company for mineral oil products in Munich in 1929, is today part of Freudenberg Chemical Specialities SE & Co. KG, a Business Group of the Freudenberg Group, Weinheim. Klüber Lubrication has about 2,000 employees in more than 30 countries. For further information, please click <http://www.klueber.com>

About Freudenberg Chemical Specialities

Freudenberg Chemical Specialities develops, manufactures and markets chemical specialities. To be close to its customers, the company is represented globally in the market with its five brands, Klüber Lubrication, Chem-Trend, OKS, SurTec and Capol. Freudenberg Chemical Specialities is one of the global leading manufacturers of specialty lubricants, release agents, chemotechnical maintenance products, and solutions for surface and galvanic technologies as well as polishing agents, glazes and release agents for the food-processing industry. Headquartered in Munich, Germany, the Business Group runs its own companies in some 40 countries. Freudenberg Chemical Specialities employs about 3,600 people and generated sales of about € 1.1 billion. For more information, please visit <http://www.fcs-munich.com>
