ITMA 2019 online space application opens in May

15 March 2017 - ITMA, the world's largest textile and garment technology showcase will continue its focus on innovation for its upcoming edition in Barcelona in June 2019, with the main theme of the show being 'Innovating the World of Textiles'.

Mr Fritz P. Mayer, president of CEMATEX, the European Committee of Textile Machinery Manufacturers, which owns the ITMA exhibition, explained: "The increasingly high level of automation and digitisation in combination with real time data tracking and interconnection has spawned the 4th industrial revolution and the emergence of smart factories. ITMA is a unique showcase of live machinery demonstrations and innovative solutions that boost productivity and profitability.

"For this latest edition of ITMA, we have chosen to focus the industry's attention on innovation which creates a competitive advantage for manufacturers. Sustainable innovation that drives growth for the textile and garment industry will continue to be emphasised at the exhibition."

As many leading textile machinery and raw material manufacturers, and service providers look forward to the exhibition to launch or promote their latest innovations, the organiser of ITMA 2019, ITMA Services, has already been receiving numerous enquiries for participation.

Mr A.E. Roberts, Chairman of ITMA Services, said: "ITMA was last held in Barcelona in 2011. We expect strong response when the exhibition returns to the city after eight years.
