

ITMA 2023

08 — 14 JUNE 2023

FIERA MILANO RHO
MILAN . ITALY

www.itma.com

TRANSFORMING
THE WORLD
OF PRINTING

MAKE YOUR MARK

Textile printing is under pressure to transform by digital disruptors and a global need for sustainability. As a result, the fashion, home textile, and nonwoven industries, among others, have a great demand for innovative printing technologies and inks. Make your mark at ITMA 2023 and be a part of the world's largest ecosystem across the textile industry.

/// It's great to have digital and screen-printing inks exhibited in the printing chapter. Visitors were able to locate us alongside our industry partners which was extremely beneficial from a strategic marketing perspective. ITMA is a world class platform for us to enhance our branding and profile our latest products. ///

Sergio Prenna, Global Marketing Manager Digital Inks, Huntsman Textile Effects

Printing is at the heart of ITMA

An integral part of the textile and garment manufacturing value chain, the printing sector at ITMA 2019 featured:

- 12% of total exhibition space
- The entire supply chain
 - printing machinery
 - digital printing machinery
 - auxiliary machines for printing
 - accessories for printing machinery
 - inks

/// I missed the last ITMA in Milan. After eight years, I find there is a big jump in technology. There are many interesting new developments, such as digitalisation and automation, as well as more eco-friendly products. I came here to also buy equipment for my factories, so this has been a fruitful trip for me. ///

Kihak Sung, Founder of Youngone Corporation & President of International Textile Manufacturers Federation

**Massive
growth; huge
opportunity**

**Global textile printing
market to reach:**
